Summary

I am an AI automation engineer, workflow architect, and cybersecurity specialist. I build secure, complete automation systems from scratch using tools like **n8n**. I can build any type of workflow, including AI agents, voice bots, and chatbots. Because I know cybersecurity, I make sure all backends, databases, and data pipelines are patched and completely secure. I also build 3D websites and custom SaaS dashboards that connect directly to automations to run entire systems for businesses like clinics or HVAC companies.

Skills

Automation n8n, Make.com, Zapier	Backend and Tools Supabase, Chatwoot, Twilio, Vapi, OpenAI/Gemini APIs, Webhooks
Frontend Development Next.js, React, 3D web development, SaaS dashboards, Netlify, Vercel	Security Workflow hardening, vulnerability patching, secure backends
Vibe Coding Stack Claude Code, Cursor, Antigravity, Trae	

Languages

English Fluent speaker	Urdu Native speaker

Certificates

Mastercard Cybersecurity Job Simulation (Issued July 2026)	Commonwealth Bank Introduction to Cybersecurity Job Simulation (Issued July 2026)
Make.com AI Automation Explorer (Issued November 2025)	Make Make Foundation (Issued November 2025)
NASA International Space Apps Challenge Certification (Issued October 2024)	

Projects

- Apex Home Service Agency Automation**
An AI powered service automation platform that combines an intelligent booking chatbot with a full operations dashboard. It handles the entire customer journey from inquiry to booking to completion while giving owners real-time business analytics and workers a simple self-service portal.
- SmileCare — Clinic Automation**
Aria is a multi modal AI clinic assistant that handles the entire patient interaction lifecycle queries, complaints, insurance, doctor knowledge, and appointments while understanding text, voice, and uploaded documents like prescriptions or past records.

Brenda — Real Estate AI Calling Agent

Brenda is a fully voice-based AI calling agent built for real estate teams. She makes outbound calls to leads, answers inbound customer calls, and handles the entire appointment lifecycle in natural, professional conversation then automatically logs call notes into a spreadsheet and briefs the realtor ahead of time on what each upcoming caller wants to discuss.
